PRESTIGE SPS® The new generation of bags with GEWA SPS®-system. The SPS®-system (Side-Protection-System) used for our GEWA Prestige gig bags consists of a fiberglass inlay, worked into the cloth of the bag thus providing overall protection of the instrument. In combination with the 20 mm highly compressed foam padding, the SPS® guarantees perfect protection against shocks and other external hazards. The GEWA Prestige gig bags combine the protection characteristics of a case with the carrying comfort of a bag. Further details are listed below:

GEWA Gig Bag for Flugelhorn SPS

- SPS®-system
- Cordura 1680 Denier, black
- Padded plywood support in bell area
